Operational Necessities - At much less then you expect

Libby A/MA32A-60A Power Unit

A perfect combination of GPU/ASU in a towable small cart, very unique, highly efficient. Currently, we have 2 x A/MA32-60A Power Units that have been completed. Each unit, equipped with a “Zero Time” overhauled Gas Turbine. Each unit comes with 2 years engine warranty. We maintain a library and spare parts to support our products.

A/MA32-60A Power Unit has been servicing western air forces since the late 1960s’ and are still in service around the world. Today, these units are being highly sought after. A small number of shops, in North America, are capable to bring these units back to full life expectancy. North East Aviation is one. Our program includes engine overhaul and refurbishment process for the unit. A big positive modernisation change has also been introduced with an upgraded GTCP85 Gas Turbine Engine of a younger age and better capable to preserve Diffuser pressure while operating at higher altitudes and or, higher ambient temperatures. The engine, in “Zero Time” overhauled condition, comes with a 2 years warranty.

A/MA32A-60A - Specifications

Length (Towbar up)	118"	3000 mm
Width	68"	1727 mm
Height	67"	1702 mm
Weight	2900 lb.	1315 kg
Electrical Output: AC 200/115V	218 amp	75 kva
28.5 Volt DC, Output: Optional	900 amp	continuous
Air Supply	155 ppm	54 psi

We offer Ground support equipment, including, 400 Hertz and 28 VDC GPU's, Aircraft Lavatory and Water Units, Tugs, Maintenance stands, Aircraft tripod jacks, Aircraft Tow bars and parts for GSE. We have been in the aircraft ground support business since 1987 with facilities in Mississauga, Ontario, CANADA.
